CONSERVATION CONTACTS

The **Biodiversity Conservation Center** is a Russian non-profit, non-governmental organization aiming to preserve the biological diversity of Northern Eurasia. BCC's programs help to conserve wilderness, endangered species and ecosystems, promote public environmental education, and assist other nature conservation groups to achieve these goals.

The **Center for Russian Nature Conservation**, (a project of the Tides Center), assists nature conservation efforts in Northern Eurasia through information exchange, facilitation of professional exchanges, and assistance with fundraising for partner organizations.

The **Pocono Environmental Education Center** runs school field trips, retreats, workshops for educators and family vacation programs in order to promote better understanding of the complexities of natural and human-designed environments.

Russian Conservation News is produced with support from the **Weeden Foundation, the Turner Foundation, the John D. and Catherine T. MacArthur Foundation, and the Pocono Environmental Education Center.**
