BCC-WHO ARE WE??

BIODIVERSITY CONSERVATION CENTER OF THE SOCIO-ECOLOGICAL UNION (BCC SEU).

The Biodiversity Conservation Center serves as a consultation, information and fundraising center coordinating a wide range of projects in biodiversity conservation. The Center is made up of specialists in protected areas management, legislation, and planning, fundraising, communications, Geographic Informations Systems, ecosystem restoration and many other aspects of conservation. Governed by a board of eight conservationists, the BCC has 18 paid staff members, most of whom are part-time, and 30 to 50 volunteers.

BCC provides legal and management consultations to nature reserves and governmental agencies, and participates in drafting conservation legislation at federal and regional levels. BCC's role in information involves collection, analysis, and publication of newsletters and handbooks for professionals and public organizations. Several projects are housed within BCC, including a Biodiversity Atlas which maintains a GIS database on rare and endangered flora and fauna.

Most BCC's programs are implemented in close cooperation with various governmental agencies, research institutions and NGOs, including the Ministry of Environmental Protection, Institute of Geography, ISAR-International Clearinghouse on the Environment, The Nature Conservancy, Laboratory for Ecological Designs, Vodlozerski National Park, Briansky Les Zapovednik, the Ecological Club of Novosibirsk University, Tadjik Socio-ecological Union, Moscow Programme Office of World Wildlife Fund-International, and many others.

Because of its close ties with these organizations, BCC is able to provide international organizations and foundations, and potential donors with information on specific activities in biodiversity conservation in the FSU.
